How will we communicate in the year 2050? Some experts predict that technology will change our lives in amazing ways. First, holography will become a common tool for meetings. Instead of making a normal video call, you can attend a meeting with your 3D image. This makes you feel like you are being there in person with your colleagues.

Secondly, we might use telepathy to communicate. This means people will wear a tiny device to send their thoughts to others without talking or emailing. This technology could help us overcome language barriers instantly. However, there are some concerns. Some people think that telepathy devices could be dangerous because "bad" people might "read" our minds or take advantage of our thoughts. Moreover, humans might become too lazy to talk or even move if they rely too much on these high-tech devices.

28. What is the main idea of the passage?

- A. The history of communication.
- B. Ways of communicating in the future.
- C. The problems of modern smartphones.

29. What is the advantage of using holography in meetings?

- A. It is cheaper than a phone call.
- B. It makes people feel like they are meeting in person.
- C. It helps people to translate languages.

30. According to the text, what does "telepathy" mean?

- A. Using 3D images to talk.
- B. Sending voice messages via the Internet.
- C. Communicating with others by using thoughts.

31. Why are some people worried about telepathy?

- A. Because it is too slow to send a message.
- B. Because bad people might "read" our minds.
- C. Because it is only for students.

32. What might happen if we rely too much on future technology?

- A. We might become lazier.
- B. We will talk to each other more.
- C. Language barriers will become more serious.

PART VI. ORDERING (0.5 pt)

Arrange the sentences to make a complete dialogue.

33. a. I've never had a video conference call before.

- b. Don't worry. I'll connect with you via one of my tablets now.
