Question 22. A. Since then, its growth has been maintained in a slow way
   B. Since then, maintaining its growth has been unsteady
   C. Since then, its gradualness in growth hasn't been maintained
   D. Since then, it has maintained a gradual growth

Read the following passage about debate corner and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

Digital media is any form of media that is created, viewed, and distributed via electronic devices. Examples of digital media include websites, social media, videos, video games, digital advertising, software, and electronic books. With the development of technology and smart devices in recent years, digital media saw a **sharp** rise. This raises the question of whether digital media will replace traditional media such as printed newspapers, broadcast TV, and radio. Below are two opinion pieces sent to our Debate Corner this week.

Nowadays, it is much easier and more convenient to access information via digital media. Most digital content is also freely accessible. All it takes is a few clicks, and you can read the latest news, watch videos, or see online adverts. In addition, digital media forms are more interactive. For example, customers can provide instant feedback, which can be used to solve any problems. In return, almost every organisation can reach **its** target customers easily via digital media. Furthermore, digital media is more flexible since information can be updated easily and frequently. By contrast, articles in printed newspapers or adverts on TV cannot be changed immediately. With more than 75 million social media users in Viet Nam and the number is increasing, it will not be long before traditional media becomes a thing of the past. - **Minh Quang**

Digital media is very convenient, but its strengths are also its own weaknesses. Since anyone with access to computers and the Internet can post or share information online, it raises the question of how credible it is. On the other hand, traditional media offers information from **reliable** sources that are fact-checked. Moreover, let us not forget that digital media relies on the Internet and smart devices to work well. ***There are still remote or disadvantaged areas in Viet Nam where access to technology is limited or too expensive***. Many people also still struggle with technology. So although digital media is on the rise, traditional media such as printed newspapers, broadcast TV, and radio is **here to stay**. - **Pham Hoa**

(Adapted from Global Success-unit 7)

Question 23. What is the best title for the passage?
    A. The Rise of Traditional Media
    B. The Advantages of Digital Media
    C. Digital Media: The Future of Information
    D. The Future of Printed Newspapers
Question 24. The word "**its**" in paragraph 2 refers to _____?
    A. digital media   **B.** the organisation
    C. the problem   **D.** the feedback
Question 25. The word "**reliable**" in paragraph 3 could be best replaced by _____.
    A. expensive   **B.** accessible   **C.** trustworthy   **D.** flexible
Question 26. The word "**sharp**" in paragraph 1 line 4 is OPPOSITE in meaning to _____.
    A. steady   **B.** sudden   **C.** gradual   **D.** slow
Question 27. In which paragraph does the writer mention the issue of access to technology in faraway areas?
    A. Paragraph   **B.** Paragraph 2   **C.** Paragraph 3   **D.** Paragraph 4
Question 28. Which of the following is **NOT** mentioned in the text?
    A. The increasing use of social media in Vietnam.
    B. The high cost of accessing digital media.
    C. The flexibility of digital media in updating information.
    D. The role of traditional media in offering fact-checked information.
Question 29. Which of the following sentences best paraphrases the underlined sentence in paragraph 3?
    A. "In some faraway or mountainous parts of Vietnam, access to technology is still limited or unaffordable."

    B. In some parts of Vietnam, particularly faraway or mountainous areas, people hardly have access to the Internet."

C. "The Internet is expensive for everyone in Vietnam."

D. "Technology is easily accessible to everyone in Vietnam."

Question 30. Why does Hoa say **"here to stay"** in her opinion piece?

A. To demonstrate that digital media will only continue to be used and become more prevalent in her country.

B. To confirm her opinion that traditional media has become a part of life and will continue to be popular.

C. To emphasise that printed newspapers can easily be sent to remote places.

D. To state her opinion that digital media is on the rise.

Read the following passage about Artificial Intelligence in the mass media and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.

[I] The mass media has undergone many changes over the last century. **[II]** AI has become an important part of all forms of mass communication. **[III]**

[IV] Nowadays, people receive so much information from different sources that it is difficult to spot false stories. This is where AI can help. The **advanced** technology is able to classify types of information and recognise news that is not suitable for the public. Furthermore, **AI can automatically change data into various forms such as online graphic organisers, images, and videos.** This innovation is a breakthrough in journalism.

Social media is popular all over the world, and more and more people are using platforms such as Facebook, Instagram, or Twitter. AI can make these platforms much safer and help the users avoid identity theft. A typical example is facial recognition software that allows us to increase the safety and security of our accounts. In many cases, social networking sites require personal information, which can be **verified** via facial recognition.

Although television has been popular for a long time, **it** is now attracting larger audiences because of new features made possible by AI. TV viewers can watch programmes with higher picture quality and a lot of special effects. AI can also provide personalised recommendations to different users. The software can help TV viewers find channels or programmes based on their preferences, behaviour, and history.
