## THE TELEGRAPH REVOLUTION

From the early nineteenth century, communication underwent a dramatic transformation. Before the telegraph, messages could travel only as fast as a horse or a ship. Governments, businesses, and individuals relied on couriers, postal services, and semaphore systems to send urgent information. In 1837, Samuel Morse invented the electric telegraph, which transmitted messages over long distances almost instantaneously using coded electrical signals. The Morse code, consisting of dots and dashes, allowed messages to be sent and received efficiently.

Telegraph lines spread rapidly across Europe and North America. They connected cities, ports, and railway stations, enabling news to travel faster than ever before. [I] Newspapers, which had previously relied on slow delivery, could now provide nearly up-to-date reports from distant locations. [II] Businesses were able to coordinate operations over long distances, reducing costs and increasing efficiency. [III] Governments could receive military and political updates in hours rather than weeks. [IV]

Despite these advantages, early telegraph systems were expensive and required trained operators. Messages had to be encoded, transmitted, and then decoded upon receipt. Lines were vulnerable to damage from weather or sabotage, and the telegraph could only transmit text, not images or sounds. Nevertheless, the benefits far outweighed the limitations, and by the 1850s, telegraph networks were firmly established.

The telegraph revolutionized communication, shrinking the effective distance between people and places. It laid the foundation for later technologies, such as the telephone and radio, that would continue to transform society. By the end of the nineteenth century, instant communication had become an essential part of modern life.

**Question 31:** With which of the following topics is the passage primarily concerned?

- A. The development of newspapers in the nineteenth century
- B. A history of the telegraph and its impact on communication

- C. An account of Samuel Morse's personal life
- D. The comparison between telegraph and postal services

**Question 32:** How did businesses benefit from the telegraph?

- A. They no longer needed couriers or postal services.
- B. **They could coordinate operations over long distances.**
- C. They could transmit images and sounds to customers.
- D. They avoided the need for trained operators.

**Question 33:** How did newspapers change after the telegraph?

- A. **They could provide nearly up-to-date reports.**
- B. They became less reliant on trained journalists.
- C. They could transmit images and photographs.
- D. They focused only on local news.

**Question 34:** The word "it" in the last paragraph refers to \_\_\_\_\_.

- A. telegraph
- B. **communication**
- C. technology
- D. network

**Question 35:** According to the passage, what was one limitation of early telegraph systems?

- A. They were inexpensive and widely available.
- B. Messages could only be transmitted visually.
- C. **Lines were vulnerable to damage and sabotage.**
- D. They required no specialized knowledge to operate.

**Question 36:** Which of the sentences below best expresses the information in the bold and underlined statement: "the benefits far outweighed the limitations"?

- A. Early telegraph systems were too limited to be useful.
- B. **The advantages of the telegraph were greater than its disadvantages.**
- C. Telegraph networks were abandoned due to their weaknesses.
- D. Telegraph operators found the system too difficult to manage.

**Question 37:** The author mentions all of the following benefits of the telegraph EXCEPT \_\_\_\_\_.

- A. faster coordination for businesses
- B. nearly instant news for newspapers
- C. **transmission of images and sounds**
- D. rapid government updates

**Question 38:** The four squares [I], [II], [III], and [IV] indicate where the following sentence can be added to the passage.

**"By connecting distant locations, the telegraph also facilitated international trade and diplomacy."**

Where would the sentence best fit into the passage?

- A. [I]
- B. [II]
- C. [III]
- D. [IV]

Read the following passage and mark the letter A, B, C or D to indicate the correct answer to each of the questions.

#### THE SCIENCE OF LEARNING WITH DR. EMILY WARD

Dr. Emily Ward is a cognitive neuroscientist who has spent over twenty years studying how humans acquire knowledge and retain information. In her latest book, *Unlock Your Mind*, she claims that readers can significantly improve their memory, creativity, and problem-solving skills by following scientifically proven techniques. Ward herself overcame early challenges in school, particularly with focus and organization, to earn a PhD in neuroscience and has since published over 70 peer-reviewed papers. Her methods are now used by schools, corporations, and therapy programs worldwide, helping millions of people enhance their learning. [I]

*Unlock Your Mind* introduces the concept of "adaptive learning networks", which expands traditional definitions of intelligence beyond standard IQ measures. Ward argues that intelligence is multi-faceted, incorporating emotional, social, physical, and creative abilities. She emphasizes that developing these areas can lead not only to academic success, but also to improved wellbeing, resilience, and confidence.

Small daily exercises, such as mindful reflection, journaling, or coordinated physical activities, are suggested to strengthen neural pathways. Ward notes that most people use only a fraction of their cognitive potential, leaving significant room for improvement. “I once believed that test scores defined intelligence,” she admits. “Now I know that cognitive ability can be nurtured systematically.”

Ward’s early experiences inspired her approach. At school, she noticed that students who struggled with conventional tests often excelled in artistic, spatial, or social tasks. [III] “These students displayed remarkable talents that traditional assessments failed to capture,” Ward explains. [III] She began studying diverse student populations and repeatedly observed similar patterns. [IV] For example, she recalls a ten-year-old who solved a complex logic puzzle in an unconventional way, revealing insight that standard tests would have overlooked. Ward uses such examples to illustrate how intelligence can manifest in unexpected forms.

Personal beliefs, Ward argues, often limit achievement. The first barrier is self-doubt, which prevents many from exploring their full potential. The second is the belief that certain skills, such as drawing or musical ability, are innate rather than learnable. Ward demonstrates that with proper guidance, anyone can acquire these abilities. “Learning to play an instrument, paint, or solve problems is like learning a new language: the capacity is present in everyone,” she asserts.

The final chapters of *Unlock Your Mind* provide exercises for each cognitive domain, encouraging readers to develop them in balance. Ward compares the mind to an orchestra: each cognitive skill is an instrument, and while one can produce a melody with only a few instruments, using all of them creates a rich, vibrant symphony. Developing all areas harmoniously, she claims, leads to a life that is not only successful but also deeply fulfilling.

**Question 39:** What is implied about Dr. Emily Ward in the first paragraph?

- A. She is more renowned for her publications than her teaching.
- B. She attributes her credibility to her personal experiences.**
- C. Her methods are controversial in the field of neuroscience.
- D. Some of her claims are unverified.

**Question 40:** What does *Unlock Your Mind* suggest about intelligence?

- A. IQ is the only measure that matters.**
- B. Intelligence can be developed** in multiple domains.
- C. Emotional skills are less important than academic skills.
- D. Standardized testing is the most effective method.

**Question 41:** The phrase “adaptive learning networks” is mentioned to \_\_\_\_.

- A. illustrate a broader view** of intelligence
- B. describe the exercises in the book
- C. explain why some students fail academically
- D. show that IQ tests are outdated

**Question 42:** The phrase “nurtured systematically” in paragraph 2 mostly means \_\_\_\_.

- A. left to develop naturally
- B. trained methodically**
- C. measured carefully
- D. overlooked intentionally

**Question 43:** Ward uses the child solving the logic puzzle as an example of \_\_\_\_.

- A. intelligence manifesting in** unexpected ways
- B. standardized tests measuring talent accurately
- C. innate ability being the most important factor
- D. artistic skill being easier than logical skill

**Question 44:** Which of the following square brackets [I], [II], [III], [IV] best indicates where the sentence “Her methods have influenced educational programs internationally.” can be inserted?

- A. [I]**
- B. [II]
- C. [III]
- D. [IV]

**Question 45:** According to Ward, one factor preventing people from reaching their potential is \_\_\_\_.

- A. the belief that some skills are innate
- B. too much exercise in daily life
- C. lack of standardized testing
- D. excessive academic pressure

**Question 46:** Ward uses the orchestra analogy to illustrate \_\_\_\_.

- A. mental exercises can be learned quickly
- B. developing all cognitive skills leads to a richer life
- C. music education is essential for intelligence
- D. standard tests measure each skill accurately

**Question 47:** Which of the following best summarises Ward's view in the article as a whole?

- A. Intelligence is fixed and measured by academic achievement
- B. People underestimate their cognitive abilities
- C. Traditional tests are sufficient to assess intelligence
- D. Skills cannot be improved systematically

**Question 48:** The word "vibrant" in the last paragraph is opposite in meaning to \_\_\_\_.

- A. lively
- B. dull
- C. colorful
- D. dynamic

**Mark the letter A, B, C, or D on your answer sheet to indicate the sentence that is closest in meaning to each of the following questions.**

**Question 49:** *Although she rarely travels abroad, Maria has a wide knowledge of international cultures.*

- A. Maria knows a lot about international cultures, even though she seldom goes abroad.
- B. Maria travels abroad frequently, which is why she knows much about other cultures.
- C. Maria's knowledge of international cultures is limited because she rarely leaves her country.
- D. Maria does not like learning about other cultures, although she sometimes travels abroad.

**Question 50:** *The museum received more visitors last year than in any previous year, most of whom were students.*

- A. Students were the only visitors to the museum last year, which was a record.
- B. Last year, the museum had more visitors than ever, many of them students.
- C. Last year's museum attendance was lower than usual, particularly among students.
- D. The museum did not allow students to enter last year, even though attendance increased.

**Question 51:** *Experts claim that climate change is causing more frequent and severe hurricanes in coastal regions.*

- A. Climate change may be contributing to the increase in the number and intensity of hurricanes.
- B. Hurricanes are increasing, but climate change has no effect on them.
- C. Coastal regions are safe from hurricanes, despite climate change.
- D. Experts are certain that hurricanes are entirely caused by climate change.

**Question 52:** *Without the advanced software, the engineers could not have completed the project on time.*

- A. The engineers finished the project on time only because they had advanced software.
- B. The engineers would have completed the project on time even without the software.
- C. Although they had advanced software, the engineers failed to finish the project.
- D. The engineers were able to complete the project on time because they ignored the software.

**Mark the letter A, B, C, or D on your answer sheet to indicate the sentence that best combines the pair of sentences given in each of the following questions.**

**Question 53:** The team submitted the report late. Therefore, the client was dissatisfied.

- A. As the team submitted the report late, the client was dissatisfied.
- B. The team submitted the report late, even though the client was satisfied.
- C. Although the team submitted the report late, the client was satisfied.
- D. The client was dissatisfied, notwithstanding the team submitted the report on time.
