Part 1. Career Choices (1.25 points)

Read the text and choose the correct answer A, B, C, or D for each question.

A passage about how teenagers choose their future careers.

Choosing a career is one of the most important decisions in a person's life. Many students choose their jobs based on their parents' advice. However, others prefer to follow their own interests. For example, if you love drawing and designing, you might want to become an architect. If you are good at science and like helping people, being a doctor could be a great choice. It is also important to consider the salary and the working environment. Nowadays, many young people are interested in IT jobs because they offer high salaries and the chance to work with modern technology.

What is the main idea of the text? A. How to become a doctor B. The importance of choosing a career C. Why IT jobs are popular D. Parents' advice on jobs

According to the text, what should someone who loves drawing become?

- A. A doctor B. An architect C. An IT engineer D. A teacher

What are two factors mentioned that are important when considering a job?

- A. parents B. students C. jobs D. interests

Part 2. Life in Space (1.4 points)

Read the text and decide if the statements are True or False.

A passage about the International Space Station (ISS).

Statements	T	F
<p>The International Space Station (ISS) is a large spacecraft in orbit around Earth. It serves as a home where crews of astronauts and cosmonauts live. The ISS is also a unique science laboratory. Several nations worked together to build and use the space station. It orbits Earth at an average altitude of approximately 400 kilometers. It travels at 17,500 mph. This means it orbits Earth every 90 minutes. NASA uses the station to learn about living and working in space. These lessons will make it possible to send humans farther into space than ever before.</p>		

Only one nation was involved in building the ISS.		
The ISS orbits the Earth once every hour.		
The ISS helps NASA prepare for future missions farther into space.
