Read the following passage about development of mass media and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

The development of mass media has dramatically transformed the way people communicate, share information, and engage with the world. From the invention of the printing press in the 15th century to the rise of television and, more recently, the internet and social media, the means by which we consume news and entertainment have evolved at an unprecedented rate. Today, traditional forms of mass media such as newspapers, radio, and television still play a significant role, but the digital revolution has shifted the landscape toward online platforms.

Social media, in particular, has become one of the dominant forms of communication, enabling people to connect globally in real-time. Platforms like Facebook, Twitter, and Instagram allow users to share opinions, experiences, and media with vast audiences. The spread of digital media has also had a profound impact on journalism, with citizen journalism becoming increasingly **prevalent**. People no longer rely solely on professional reporters to provide news; instead, **they** can report and share stories themselves.

However, **the rise of digital media has also raised concerns about misinformation**. The speed at which information spreads on social media can result in false or misleading stories being shared rapidly, sometimes

causing harm before corrections can be made. Additionally, the dominance of certain large corporations in the media industry has led to **concerns** about the concentration of media ownership and its impact on diversity and fairness in reporting.

Despite these challenges, mass media continues to evolve. The introduction of new technologies, such as artificial intelligence and virtual reality, promises to further change how we interact with media in the coming years. As the media landscape continues to evolve, it remains to be seen how it will shape public opinion, political discourse, and our understanding of the world.

Read the following passage about *The Development of Mass Media* and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.

[I] The growth of mass media in recent decades has been one of the most transformative phenomena in global communication. From traditional print media to digital platforms, the evolution of mass media **has reshaped**

how people receive and share information. [II] Today, mass media encompasses various forms, including newspapers, radio, television, and, increasingly, online platforms such as social media and streaming services. By 2030, experts predict that digital media will dominate, overtaking traditional media in terms of global consumption. [III] Several factors have driven this rapid growth, but the consequences, both positive and negative, are still unfolding. [IV]

One key factor behind the growth of mass media is technological advancement. Innovations such as the internet and smartphones have allowed people to access information instantly, anywhere, and anytime. This has made digital media more accessible and appealing, especially to younger audiences. Additionally, the increasing use of social media platforms has provided a space for individuals to participate in content creation, leading to a **democratization** of information. On the other hand, traditional media, such as print newspapers and broadcast television, have struggled to maintain their audience base.

However, the rise of mass media has also brought challenges. One significant issue is the spread of misinformation. With the ease of sharing content online, false or misleading information can quickly go viral, leading to widespread confusion. Another concern is the growing **concentration** of media ownership, where a few large corporations control a substantial portion of the media landscape. This can limit the diversity of viewpoints and result in biased reporting.

In conclusion, while **mass media has revolutionized the way we communicate and access information, it has also created challenges that require careful management** to ensure its positive impact on society.
