Mã đề 0917

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 1 to 10.

Technology, Deterrence and the Battle Against Waste Crime

Illegal waste dumping is frequently dismissed as a local inconvenience; however, in practice it constitutes a highly organised and financially lucrative form of environmental crime. In England alone, such activity is estimated to cost the economy approximately £1 billion annually, while simultaneously imposing long-term ecological and social damage. Against this backdrop, the government has announced the establishment of a 33-member drone unit intended to enhance the detection and investigation of unlicensed waste sites. Far from being a symbolic gesture, this initiative represents a strategic shift towards a more **assertive** and technology-driven enforcement model. [I]

The announcement coincided with the conviction of Varun Datta at Birmingham Crown Court. Datta orchestrated the illegal disposal of more than 4,000 tonnes of municipal waste across 16 sites, including protected land and a historic manor property. By falsely declaring that the waste would be transported to a licensed facility near Sheffield, he redirected it to unauthorised locations nationwide. [II] The court ordered him to repay over £1 million, reflecting the financial benefits derived from his activities, in addition to compensation and prosecution costs. [III] Although his custodial sentence was suspended, the substantial financial penalty was intended to undermine the economic incentives that often make waste crime attractive to organised groups.

Central to the revised strategy is the expanded role of the Environment Agency, which now integrates advanced surveillance technologies into its investigative framework. Several drones will be equipped with lidar systems capable of generating highly detailed topographical maps, enabling authorities to identify concealed or rapidly changing dumping sites. Officials argue that such innovation is necessary because organised offenders have become increasingly adept at exploiting regulatory gaps and avoiding conventional inspections. In this sense, technological monitoring is presented not as an optional enhancement but as a proportionate response to evolving criminal methods. [IV]

Nevertheless, questions remain regarding whether surveillance and financial penalties alone can deliver sustained deterrence. Critics contend that suspended prison sentences may dilute the perceived severity of the offence, potentially weakening the overall message of zero tolerance. Moreover, effective enforcement is resource-intensive and depends upon coordination between national regulators, local authorities and private landowners. Without consistent collaboration and long-term funding, even sophisticated technology may struggle to reverse entrenched patterns of illegal disposal.

Ultimately, while drones and harsher penalties are unlikely to eradicate waste crime entirely, **they** signal an effort to recalibrate the balance of risk and reward that has historically favoured offenders. By combining technological precision with legal accountability, policymakers appear determined to demonstrate that environmental crime will no longer remain a low-risk, high-profit enterprise.

Question 1. According to paragraph 1, the establishment of the drone unit is best understood as an attempt to ____.

- A. replace conventional inspection methods with fully automated monitoring systems
- B. address illegal dumping through a more proactive and technology-oriented enforcement approach
- C. increase the number of personnel responsible for environmental compliance
- D. offset the economic losses caused by environmental offences

Question 2. The word "**assertive**" in paragraph 1 is closest in meaning to ____.

- A. hesitant and cautious
- B. temporary and flexible
- C. forceful and determined
- D. experimental and innovative

Question 3. Why are lidar-equipped drones presented as a necessary component of the revised enforcement strategy?

- A. They improve the accuracy of detecting concealed dumping sites that traditional inspection procedures may overlook.
- B. They prevent offenders from exploiting sentencing inconsistencies within the judicial system.
- C. They symbolise a broader governmental commitment to technological modernisation in environmental governance.
- D. They reduce the overall administrative burden associated with prosecuting environmental offences nationwide.

Question 4. Which of the following best summarises paragraph 3?

- A. Regulatory authorities are restructuring investigative practices to address increasingly adaptive criminal strategies.
- B. Organised offenders have shifted towards less profitable but more discreet disposal methods.
- C. Traditional inspection systems remain adequate despite the emergence of new technological tools.
- D. Waste crime has expanded primarily because enforcement agencies underestimated its economic impact.

Question 5. According to the passage, the financial penalty imposed on Datta was intended to ____.

- A. compensate local authorities for technological investment
- B. replace imprisonment as the primary form of punishment
- C. remove the financial motivation behind organised waste crime

D. highlight the symbolic importance of environmental protection

Question 6. According to paragraph 4, which of the following factors is identified as essential for achieving sustained effectiveness in combating illegal waste crime?

- A. The immediate introduction of mandatory prison sentences for all environmental offences.
- B. Sustained inter-agency cooperation supported by consistent financial and institutional resources.
- C. Exclusive reliance on advanced aerial surveillance technologies across affected regions.
- D. Comprehensive public awareness initiatives designed to discourage community-level participation.

Question 7. Where in the passage would the following sentence best fit?

“This case therefore served as a practical illustration of the economic logic underpinning organised waste crime.”

- A. [IV]
- B. [II]
- C. [III]
- D. [I]

Question 8. The word “they” in paragraph 5 refers to __.

- A. policymakers and regulators
- B. drones and harsher penalties
- C. organised criminal groups
- D. patterns of illegal disposal

Question 9. Which of the following can be inferred from the passage?

- A. Organised waste crime has persisted partly because the anticipated financial returns have historically exceeded the perceived risks of enforcement.
- B. Most individuals involved in illegal disposal activities are unaware of the long-term ecological consequences.
- C. The expansion of drone surveillance reflects widespread public dissatisfaction with current environmental policies.
- D. Regulatory agencies previously lacked both legal authority and technological capacity to address illegal dumping effectively.

Question 10. Which of the following best summarises the passage?

- A. Illegal dumping primarily results from limited public awareness rather than coordinated criminal activity.
- B. Financial sanctions represent the single most effective mechanism for addressing environmental offences nationwide.
- C. The government is adopting a multifaceted strategy combining technology with financial and legal deterrents to rebalance criminal incentives.
- D. Drone surveillance will gradually replace conventional inspections and permanently eliminate organised waste crime.

Mark the letter A, B, C or D on your answer sheet to indicate the best arrangement of utterances or sentences to make a meaningful exchange or text in each of the following questions from 17 to 21.

- Question 17.**
- a. However, the reality was far more demanding than I had anticipated, as cultural differences and tight deadlines quickly tested my adaptability.
 - b. Instead of feeling discouraged, I gradually adjusted my communication style and learned how to collaborate effectively with colleagues from diverse backgrounds.
 - c. Participating in an international exchange programme motivated me to pursue broader career opportunities beyond my home country.
 - d. This challenging yet transformative experience ultimately strengthened my resilience and brought me closer to achieving global success.
 - e. At first, I was excited about working on multinational projects and expanding my professional network.

- A. c – e – b – a – d B. c – e – a – b – d C. c – a – e – b – d D. e – c – a – b – d

- Question 18.**
- a. Mia: Honestly, chances like that don't come up very often. It could help your career in the long run.
 - b. Leo: I've just been offered a short-term contract abroad, but I'm not sure if I should take it.
 - c. Leo: Yeah, I guess it might give me an edge later on.

- A. a – b – c B. b – c – a C. b – a – c D. c – b – a

- Question 19.**
- a. Overall, these developments suggest a clear transition from a predominantly agricultural village to a more urbanised and functionally diverse area.
 - b. Significant developments occurred in Greenfield village between 1990 and 2015, during which the village underwent considerable changes.
 - c. By 2015, several new housing estates had been constructed on former farmland, and the main road had been extended to the east.
 - d. In 1990, Greenfield was largely rural in character, consisting mainly of open fields, a small number of houses, and a primary school located near the river.
 - e. Furthermore, a community centre and a small retail area were added in the southern part of the village, replacing what had once been open land.

- A. d – c – b – e – a B. b – c – d – e – a C. d – b – c – e – a D. b – d – c – e – a

Question 20.

Mã đề 0917

- a. I am writing to express my interest in the part-time sales assistant position advertised on your website.
b. I believe my customer service experience and strong communication skills make me a suitable candidate for this role.
c. I am currently a second-year university student seeking practical work experience to develop my professional skills.
d. I would welcome the opportunity to attend an interview at your convenience.
e. I have attached my CV for your consideration and look forward to hearing from you soon.
- A.** a – c – b – d – e **B.** a – c – b – e – d **C.** c – a – b – d – e **D.** a – b – c – e – d

Question 21. a. Liam: I agree. Protecting wildlife isn't just a local issue anymore; it's a global responsibility.
b. Sophie: I read that several countries are working together to save endangered species.

Ethnographers conduct research by entering the “field,” (31) _____. They aim to produce a detailed cultural portrait of a group within its natural setting. Typically, ethnographic studies focus on a group of individuals at a single site, examining shared patterns of behavior, belief, and language that have evolved over time. Fieldwork often involves observing and interviewing participants in the contexts where they live and work. Data analysis begins with describing and analyzing the culture-sharing group and interpreting its patterns within the broader context of culture in action. (32) _____. The roots of ethnographic research lie in anthropology, sociology, education, and postmodern concerns about interpretation and representation.

Historically, three main types of ethnographic designs have emerged: realist, case study, and critical ethnographies. A realist ethnography presents an objective account of a culture-sharing group. (33) _____. Case studies focus on a specific program,

event, or activity and offer an in-depth description and analysis based on extensive data collection. Critical ethnography emphasizes advocacy, giving voice to marginalized groups and addressing issues of power and authority. Together, these three ethnographic designs illustrate the methodological diversity of ethnographic research, (34) _____.

Question 30.

- A. People behave and believe in a system of cultural concepts and encompass them broadly
- B. Human behavior and their belief systems are broadly encompassed the concept of culture
- C. The concept of culture is broad and encompasses human behavior and belief systems
- D. Culturally, encompassing belief systems in human behavior is a broad concept

Question 31.

- A. observing and interviewing are means of collecting extensive data
- B. that extensive data are collected through interviewing and observation
- C. through interviewing and observation, data are collected extensively
- D. where they collect extensive data through observation and interviewing

Question 32.

- A. Participants, on the contrary, respect for ethnographers while remaining self-aware in a reflexive inquiry in research.
- B. Ethnographers, therefore, adopt a reflexive inquiry style, remaining self-aware in research while maintaining respect for participants.
- C. Therefore, participants remain a reflexive inquiry style in research while maintaining their respect for ethnographers.
- D. On the contrary, ethnographers maintain a reflexive inquiry style and adopt self-aware in research to remain respect for participants.

Question 33.

- A. Typically, it is written from a researcher's perspective basing on the final interpretation which is provided by the third person.
- B. Regardless of a third-person perspective, it is typically written basing on the researcher's sole perspective and interpretation.
- C. This type of ethnography is typically written from a third-person perspective, with the researcher providing the final interpretation.
- D. The researcher writes this type of ethnography from their own perspectives without any interpretation from a third person.

Question 34.

- A. each of them offers a distinct lens in order to understand social and cultural phenomena
- B. to understand social and cultural phenomena through a distinct lens offered by them
- C. each offering a distinct lens through which social and cultural phenomena can be understood
- D. because social and cultural phenomena can be understood from a distinct lens offered

Read the following leaflet and mark the letter A, B, C or D on your answer sheet to indicate the option that best fits each of the numbered blanks from 35 to 40.

Eat Real Food Policy – Updated U.S. Dietary Guidelines (2025–2030)

The Eat Real Food Policy refers to the updated *United States Dietary Guidelines for Americans (2025–2030)*, marking a significant shift in federal nutrition guidance. (35) _____, the policy delivers a clear message: prioritise real, minimally processed foods to curb diet-related diseases and improve public health. The guidelines emphasise real, whole foods (36) _____ are recognisable in their natural form. Protein is highlighted as a key nutrient and encouraged at every meal. Fruit and vegetables are prioritised with (37) _____, while whole grains are promoted over refined grains.

The policy addresses rising (38) _____ of obesity, prediabetes, and chronic diseases linked to poor diets by encouraging a shift towards nutrient-dense. In doing so, it seeks to foster long-term (39) _____ habits that support sustainable public health outcomes. These science-based guidelines apply (40) _____ all life stages and influence national programmes such as school meals, public health campaigns, and nutrition education.
