Rediscovering the Joy of Reading in the Digital Age					
In an era where screens dominate our time, reviving the reading culture may seem challenging—but it's					
absolutely worth (46)					
Many young people (47) books regularly, but now they are often too busy (48) through social					
media. Even when they're about (49) a book, a notification can instantly interrupt them.					
It's hard to focus in such a noisy world, but those who still read say they're (50) to slow down and reconnect with deeper thinking. Reading is not only (51) to entertain but also to educate to inspire and to					
reconnect with deeper thinking. Reading is not only (51) to entertain, but also to educate, to inspire, and to build empathy—skills we're in danger of losing.					
Sadly, some students are (52) to read only for school exams, which makes them see books as a					
burden. Others feel they are supposed (53) long classics just to impress others. That's not how passion is					
built.					

Instead, we should promote acc	ess. Students shouldn	't be banned (54)	books due to small library		
fees. Everyone should be (55) to read, regardless of background. Some governments are determine					
support public libraries, and that gives us hope.					
If we make reading a habit again	n, we're likely to redise	cover not only stories, b	ut also ourselves.
