Do smartphones make you smarter?

How do teenagers in the UK and the USA use their mobile phones?

Teenagers may be connected all the time, but there is one place where most teenagers can't use their digital devices: school! In the UK, there is no law about phone use in schools, but teachers can remove devices from students if necessary.

A recent British report said that removing smartphones from schools will give students more time for their education. It said that smartphones are a big distraction, making students less productive and are bad for learning.

However, in the USA, some people do not agree. Recently, one school in New York decided to use smartphones at school. They said that smartphones can be an excellent resource for the classroom. In this New York school, smartphones can definitely make you smarter!

1 In pairs, ask and answer the questions.

- 1 What do you do with a smartphone?
- 2 Do you think it makes you smarter or less smart? Why?
- 3 Do many people have smartphones in your country?

2 Correct the sentences about the article.

- 1 All UK teachers believe smartphones are bad for students.
- 2 A recent UK report said that using smartphones in school can be positive.

3 L1 Watch Part 1 of the video and answer the questions.

- 1 What country can you see in photo A?
- 2 Why is this country so important in the video?
- 3 How similar is your country to the one video?

4 L2 Watch Part 2 of the video. Match photos A–D with captions 1–3.

What's the weather like?

If you don't know what to talk about, there's always the weather. In the UK, we do this a lot because the weather is quite mild, and it changes a lot.

In the UK, it seems that people are never prepared! When extreme weather comes, it's always a shock. Last year, a freak snowstorm brought chaos to transport in the country. British Rail cancelled trains because of 'the wrong kind of snow'! On the night of 15 October 1987, people were going to bed when a terrible storm suddenly hit the country. Trees fell down and the conditions were chaotic. But the weather forecasters didn't predict it at all.

And can the weather affect our moods or character? Well, there is a saying in the UK: 'I feel a bit under the weather'. It means you don't feel very well. People who live in sunny climates seem happier. Those who live with grey skies and little light in winter can be more miserable.

- In pairs, discuss: Do you think the weather can affect you? How?
- 2 Read the article. Mark the sentences T (true) or F (false). Correct the false sentences.
 - \square The weather in the UK is changeable.
 - The great storm of 1987 in the UK was a surprise.
 - 3 To be under the weather means 'to be depressed'.
 - 4 The tone of the article is quite serious.
- 3 © C.01 Listen and read the article again. Answer the questions.
 - 1 Does the writer think that the weather can affect mood or character greatly? Do you agree with this opinion?
 - 2 Do the people in your country have different characters due to the weather where they live?
