 D. To prove its inventiveness long before the modern era

- Question 19.** A. are used every day B. that are used every day
 C. using every day D. if they are used every day

- Question 20.** A. that is one of the most commonly used medicines in the world
 B. is one of the most commonly used medicines in the world
 C. one of the most commonly used medicines in the world
 D. which one of the most commonly used medicines in the world

- Question 21.** A. because of German ingenuity that we have X-rays
 B. that German ingenuity because we have X-rays
 C. German ingenuity because we have X-rays
 D. because we have X-rays of German ingenuity

- Question 22.** A. in case education systems are ranked
 B. when was education systems ranked
 C. providing that education systems are ranked

D. **when education** systems are ranked

Read the following article about the future of food and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

Experts predict that nine billion people will populate the earth by 2050. Medical advancements have caused the average life span and birth survival rate to **surge**. These are outstanding successes, but they've created a problem: as farmland disappears due to overpopulation, what will people eat? If scientists don't discover an answer, the world may face a food crisis. Thankfully, there are possible solutions.

Vertical farming is the concept of **cultivating** food within skyscrapers. Using advanced greenhouse technology, it's feasible to produce fruits and vegetables indoors. If this idea becomes reality, it will require significantly less land than fields. In fact, a 30-story building with a five-acre-wide base could yield a yearly harvest equivalent to 2,400 acres. This exceeds traditional farming output because plants inside a building are sheltered from the weather. With climate, water, and light control, the effects of temperature, droughts, and cloudy days are eliminated. Crops can be grown year-round. It's also beneficial that vertical farms can be constructed in close proximity to urban areas. As much as 30 percent of crops are wasted due to spoilage during transport. With a shorter distance between food and consumers, harvested produce can be delivered while **it's** still fresh.

Indoor plant production has already been successfully implemented in Japan. This country has about 50 fully operational factories that grow everything from lettuce to strawberries. **These facilities pump out food two to four times faster than traditional farming.**

Meat, on the other hand, will be trickier to copy, yet it is as essential as plants. Livestock consume more energy per food unit than any plant crop. For example, one pound of beef requires 16 pounds of grain and 2,500 gallons of water. Obviously, if everyone became a vegetarian, this would no longer be a problem. But a campaign to convince billions of omnivorous humans to stop eating meat wouldn't stand a chance. Thus, scientists are experimenting to create meat. To accomplish this, cells are taken from live animals and stored to grow into meat over time. In theory, this process could meet global demands. However, the idea is still in its infancy.

Question 23. What is said about the world's population?

- A. **It will soar because medical** knowledge has expanded
- B. It will stay constant because of the lack of available resources
- C. It will increase since the birth rate is surging everywhere
- D. It will decrease due to insufficient land

Question 24. The word **surge** in paragraph 1 is OPPOSITE in meaning to_____.

- A. boost
- B. increase
- C. improve
- D. decrease**

Question 25. The word **cultivating** in paragraph 2 is CLOSEST in meaning to_____.

- A. cutting
- B. investigating
- C. turning
- D. planting**

Question 26. The word **it** in paragraph 2 refers to_____.

- A. consumer
- B. distance
- C. food**
- D. transport

Question 27. Which of the following best paraphrases the underlined sentence in paragraph 3?

- A. **Indoor plant production produces** much more food than traditional farming.
- B. Indoor plant production produces less food than traditional farming.

- C. Traditional farming produces much more food than indoor plant production.
- D. Indoor plant production produces as much food as traditional farming.

Question 28. Why does some produce never get sold to consumers?

- A. A large amount of the crops go bad before they arrive at stores
- B. Many tests must be done to see how production can be improved
- C. Thirty percent of the crops are picked before they are fully mature
- D. Produce grown in vertical farms hasn't yet been approved for consumption.

Question 29. Which statement is TRUE?

- A. Growing crops indoors is advantageous for producing food
- B. Farming must take place outdoors
- C. Vertical farming won't eliminate the need for regular farmland
- D. Weather conditions will need to be duplicated inside produce factories

Question 30. What can we infer from the article?

- A. Most people enjoy eating both meat and vegetables
- B. Meat is more readily available than vegetables
- C. People despise the idea of growing their own produce
- D. Growing fruit indoors is much slower than normal methods

Read the following article about You Tube makes it happen and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.

In the past, it was extremely hard for would-be singers to make names for themselves. Most had little choice but to go on endless tours of nightclubs and festivals to find possible fans. **Today, You Tube has made it infinitely easier to present one's music to the world, and some have achieved tremendous success.**

(I) Back in 2005, Charmaine Pempengco placed 3rd in a televised singing competition in the Philippines and then fell off the radar. **(II)** Luckily, Pempengco, who now goes by the name Charice, had a devoted fan intent on making her **famous**. **(III)** In 2007, a YouTube enthusiast with the username FalseVoice began posting videos of Charice singing. **(IV)** By the end of the year, nearly 15 million people had been introduced to her voice. Her international debut album was so **popular** that she became the first Asian artist to enter America's Billboard music charts in the top 10.

Although Charice's story is impressive, there is another YouTube star that has attained even more fame. Justin Bieber began uploading his own videos when he was just 13 years old and, talent manager Scooter Braun discovered him after accidentally clicking on one. Not long after, Braun was able to secure a record deal for the talented singer. Over the next two years, Bieber released several songs worldwide, which took **him** from unknown singer to superstar. When his first full album came out in 2010, it went straight to number one on the Billboard charts, and lingered on the list for 77 weeks.

Question 31. Where in paragraph 2 does the following sentence best fit?

Charice won the prize in the competition, but after that she was no longer famous.

- A. [IV]
