② The use of digital devices such as tablets and laptops has revolutionized the way students learn in the 21st century. These devices have become an integral part of the modern classroom, replacing traditional paper-based materials and changing the way teachers deliver their lessons. They offer several benefits for both teachers and students.

Firstly, digital devices are highly portable, allowing students to take their learning materials with them wherever they go. This is particularly useful for students who have to travel long distances to attend school or for those who need to study on the go.

Digital devices also offer **a wealth of** interactive resources that are not available in traditional textbooks. Videos, animations, and simulations can be used to help students understand complex concepts, while quizzes and games can be used to reinforce learning and make it more engaging. Another significant advantage of digital devices is the ability to access a vast range of online resources. Students can access educational websites, e-books, and online courses from anywhere in the world, providing them with a more **comprehensive** and up-to-date understanding of the subject matter. Teachers can also use digital devices to connect with other educators around the world, sharing resources and collaborating on lesson plans.

While they offer students access to a wealth of interactive resources and educational materials, there is also the potential for distractions and technical problems. With the right approach, digital devices can be a valuable tool for modern learners, providing them with the skills and knowledge they need to succeed in the digital age.

- What is the topic of the passage?
 - How laptops and tablets have changed the way students learn.
 - Advantages and disadvantages of digital devices.
 - Future of digital devices in modern classrooms.
 - The benefits of digital devices in classrooms.
 - According to the first passage, digital devices _____.
 - completely replace teachers
 - are a necessity in modern classrooms
 - are only beneficial to students
 - include tablets and paper materials
 - The word “**a wealth of**” in paragraph 3 mostly means _____.
 - few of
 - some of
 - most of
 - a large amount of
 - The word “**comprehensive**” in paragraph 4 is closest in meaning to _____.
 - limited
 - specific
 - complete
 - wide
 - How can teachers make use of digital devices?
 - They can access educational websites wherever they are.
 - They can use digital devices for up-to-date resources.
 - They can improve their ability to access online resources.
 - They can exchange their resources with other teachers worldwide.
- ③ Are smartphones causing neck pain? According to a recent study conducted by a doctor in the US, they are even more problematic. The phenomenon known as “text neck” is becoming widespread and could result in permanent damage.

According to the surgeon, the posture we adopt while looking at our phones increases stress on our necks and can lead to excessive wear and tear that may require an operation to correct it in the long run.

Dr. Kenneth Hansraj explains that as we tilt our heads down to view our phones, the effective weight on our necks increases. At a **15-degree** angle, it's approximately **27** pounds, rising to **60** pounds at a **60-degree** angle.

Sammy Margo from the Chartered Society of Physiotherapy in the UK believes that “text neck” is **on the rise**. She notes that people become involved in texting and often underestimate the need for breaks. This can result in head pain, neck pain, arm pain, and numbness because the normal standing position aligns the curves of the neck and spine correctly. However, when you keep your chin on your chest for a long period, you stretch the whole structure.

Eventually, this, combined with an inactive lifestyle, could lead to serious consequences. Margo advises using voice recognition for making phone calls instead of texting and taking regular breaks while altering texting positions to avoid problems.

- According to the text, what is the phenomenon known as “**text neck**”?
 - A condition caused by excessive phone usage.
 - Neck pain caused by smartphone addiction.
 - Permanent damage resulting from smartphone usage.
 - The increased stress on the neck due to phone posture.
- Who believes that “**text neck**” is on the rise?
 - Dr. Kenneth Hansraj.
 - A doctor from the US.
 - Sammy Margo.
 - The surgeon conducting the study.
- Which statement contradicts the information in the text?
 - Text neck may require an operation to correct it.
 - Neck pain is not a consequence of using smartphones.
 - The normal standing position aligns the neck and spine correctly.
 - Keeping the chin on the chest for a long time stretches the whole structure.
- Which is the phrase “**on the rise**” closest in meaning to?
 - decrease
 - drop
 - rocket
 - increase
- What can be inferred about the effects of texting on the body?
 - Texting causes permanent damage to the neck.
 - Texting frequently leads to numbness in the arms.
 - Texting can result in head pain and neck pain.
 - Texting rarely causes any health problems.
